

BK-4

THINKING GREEN: VSI Bike Racks provide for existing cyclists and encourage others to take up bike transit, reducing their carbon footprint.

BK-8

GREENSITES SERIES™

GreenSites benches provide an economical alternative when looking for recycled seating. Most of these benches feature ductile iron castings from our Classic, Framers Modern™ and City Sites series. In this new configuration, the castings are complimented by horizontal steel elements that continue the metalwork color across the bench, protect against wear and provide support.

Victor Stanley extrudes 100% of its recycled plastic slats. The primary raw material for all such products is HDPE recycled resin. More than 90% of the material used in recycled plastic production is either post-consumer or post-industrial. Non-recycled additives include UV inhibitors, pigments and other agents used in the extrusion process; all of which comprise less than 10% of the total material.

With molded-through color and built-in UV resistance, our attractive and durable

New! CM-158

recycled slats shed water, resist rot and are easily cleaned. They are designed to resemble wood and come in maple, cherry, walnut and gray.

The GreenSites Series™ is a unique, highly flexible and cost-effective product line designed to help every site achieve its "greenest" rating. GreenSites Series™ products utilize the highest recycled content possible and are priced to encourage the use of environmentally-friendly outdoor furniture wherever possible. This series is the culmination of design development which makes VSI a leader in the world of recycling, energy efficiency and respect for our environment. The same concerns which governed the development of the GreenSites Series™ are reflected in every VSI design, production technique, raw material and all product and facility decisions. Whether you choose furniture from the GreenSites Series™ or any other VSI product, do so knowing that we will always manufacture with the utmost respect for the environment, the future and our planet.

ENVIRONMENTAL COMMITMENT Through carefully integrated design and innovative use of material and technology, we at Victor Stanley, Inc. have committed ourselves to manufacturing durable, attractive, strong, comfortable and environmentally sustainable site furniture. From design to production, we continually strive to reduce the energy and resource demands of our manufacturing process. We utilize thousands of tons of recycled material each year to help conserve our planet's natural resources. Our commitment to energy efficiency has resulted in a huge long-term investment in technology and equipment, reducing our net impact on energy resources.
